- Problem-solving
- Proactive
- Organized

HARD

- React Js
- Javascript
- HTML
- CSS
- Java
- Springboot
- Bootstrap
- Github
- TypeScript
- Azure DEVOPS
- Git

WORK HISTORY

► 2018 - 2019 COMPUTER SCIENCE TEACHER - CECATI 183

In my time as an instructor I had the opportunity to teach a variety of fundamental topics in computing, including systems, hardware, and software. My goal was to provide actionable understanding and also allow them to develop their project creation and problem-solving skills.

► 2021 - 2022 WEB DEVELOPMENT (FREELANCER) - LOCAL LAUNDRY

In this professional stage I dedicated myself to carrying out projects independently that would help me understand and reinforce my knowledge in the field of web development, creating a landing page for a local business, on this occasion it was a simple development implementing a frontend stack, CSS, HTML, JS and React.js.

► 2022 - 2022 WEB DEVELOPMENT (FREELANCER) - NISSAN DAOSA GDL

I continued with autonomous development but taking it to the next level, achieving larger projects with new challenges. Using the same stack for build more robust applications, collaborating with a team to whom I reported progress. I started using more advanced resources, such as catalogs, data packages, and consuming client APIs, which was crucial to strengthening my skills.

► 2022 - 2022 ASST SYSTEM ENGINEER - TATA CONSULTANCY SERVICES

I focused on supporting Java applications. My responsibilities included reviewing, reporting, and implementing solutions for basic defects in digital Java projects. It was during this time that I began working with agile methodologies and task management tools such as Notion and Jira.

► 2022 - 2024 REACT DEVELOPER - METLIFE

During this phase, my responsibilities included:

- Developing complete components and services using TypeScript, React.js, MUI, as well as other packages and libraries.
- Implementing solutions and improvements to the code of existing services and components in the application.
- Establishing connectivity with microservices and backend APIs.
- Performing tasks related to compilation, deployment, and version control system, utilizing GIT and AzDo.
