Ed Jasser Lopez Guardado

Full Stack Developer

PROFESSIONAL PROFILE

Full Stack Developer with 7+ years of experience building digital products end to end: scalable React interfaces and robust Python/Django backends. Recent experience leading critical data migrations, hexagonal architectures with DDD and CQRS, and adopting AI agents as an accelerator of the development cycle. Looking for a Senior Full Stack role, remote or hybrid, within high-performing teams.

EXPERIENCE

Muhami — *TV Azteca Project · Full Stack Developer* Feb. 2025 – Present

- Designed and built end-to-end modules (backend and frontend) for TV Azteca's sales system, applying Hexagonal Architecture, DDD and CQRS to ensure code scalability and maintainability.
- Led the migration of 1.5M+ records from Oracle to the in-house system using Python scripts, significantly reducing data migration time.
- Drove the adoption of AI coding agents (Claude, OpenCode) across the team, compressing a 3-sprint module build cycle (UI plus query, create and edit flows) down to a single sprint and accelerating time-to-delivery.
- Diagnosed and resolved production incidents through data analysis, ensuring system stability and operational continuity.
- Collaborated within an 8-person engineering team and led technical onboarding for every new hire to accelerate their ramp-up.

Stack: Python, Django, PostgreSQL, Oracle, AWS, Docker, Kubernetes, React, TypeScript

MetLife Mexico — *Remote · Frontend Developer (React)* Nov. 2022 – Jun. 2024

- Expanded MetLife's catalog with 5 new services, improving application stability and modernizing the user experience.
- Designed and built reusable UI components with React, TypeScript, HTML5 and CSS3 on a Webpack/npm build stack.
- Implemented centralized state management with Context API and integrated RESTful APIs in close collaboration with the backend team.

TATA Consultancy Services — *Guadalajara, Jalisco · Asst. Software Engineer* Jun. 2022 – Nov. 2022

- Diagnosed and fixed defects in Java/Spring Boot applications, tracking work in Jira and Notion under agile methodologies.

NISSAN DAOSA Mexico — *Guadalajara, Jalisco · Web Developer* Jan. 2022 – May. 2022

- Built Nissan Mexico's official website (catalog, locations and appointment scheduler) with React, Webpack and npm, integrating RESTful APIs alongside the backend team.

Hidrosoluciones Colima — *Colima, Mexico · Web Developer* Jul. 2019 – Jan. 2020

- Developed, maintained and updated websites for local clients using HTML, CSS3, SASS, Bootstrap, WordPress and JavaScript, optimizing performance and user experience.

TECHNICAL SKILLS

Backend: Python, Django, Java, Spring Boot, Node.js
Databases: PostgreSQL, Oracle, MongoDB
Architecture: DDD, CQRS, Hexagonal Architecture
Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3
Cloud & DevOps: AWS, Docker, Kubernetes
AI & Tools: Claude, OpenCode, Git, Jest, Jira

EDUCATION

Tecnológico de Colima — Computer Systems Engineering 2014 – 2019

ACADEMLO — Full Stack Web Development, Querétaro Oct. 2021 – May. 2021
